Product Overview

Professional Mounted Disc Plough

This mounted disc plough is specifically engineered for four-wheel tractors, offering superior performance in challenging soil conditions containing weeds, stems, and frictional debris. The robust round pipe frame ensures high durability and stability during intensive land preparation tasks. By effectively turning and aerating soil while minimizing resistance, this implement provides an ideal solution for efficient primary and secondary tillage.

Key Features

Operational Advantages

- Non-winding design prevents grass blockage
- Advanced disc cutting action for stems and roots
- Minimized working resistance for fuel efficiency
- High-strength round pipe frame construction
- Compatible with standard three-point tractor hitches

Ideal Applications

Primary Tillage, Secondary Tillage, Seedbed Preparation, Weed Control

Technical Details

Construction Details

Feature	Specification
Frame Type	Round Pipe
Tractor Compatibility	4-Wheel Tractor
Attachment System	3-Point Hitch
Disc Configuration	Independently Rotating
