Overview

High-Performance Mounted Disc Plough

This mounted disc plough features a robust round tube frame designed for primary tillage operations in demanding agricultural environments. Engineered to efficiently cut, mix, and invert soil, it excels in fields with weeds, stems, and frictional soil containing small debris. Its specialized design minimizes working resistance and prevents common issues like grass winding or blockage, ensuring consistent performance.

Technical Specifications

Compatible Tractor Power

50 HP

Minimum Power

100 HP

Maximum Power

Disc Diameter

650 mm

Min Diameter

710 mm

Max Diameter

Disc Configuration

6 discs

Key Features

Operational Advantages

- Anti-winding design prevents grass accumulation
- Resistant to blockage and soil build-up
- Efficiently cuts through stems and roots
- Low working resistance for fuel efficiency
- Adjustable disc angles for various soil types
- Depth control for customized tillage

Suitable Soil Conditions

Frictional Soil, Heavy Clay, Soil with Stems, Soil with Weeds
