Product Overview

High-Efficiency Mounted Disc Plow

This mounted disc plow is a robust agricultural implement designed for efficient primary tillage and soil preparation. It features a heavy-duty frame and hardened steel discs that effectively cut through soil, weeds, and crop residue to create an optimal seedbed for planting. The adjustable design allows for precise depth and angle control, ensuring versatility across diverse soil types and farming conditions.

Technical Specifications

Model Specifications

Model	Width (mm)	Discs	Weight (kg)	Power (hp)
1LY-2	600	2	350	40
1LY-3	900	3	400	60
1LY-4	1200	4	470	80
1LY-5	1500	5	560	120

Operational Details

Working Depth	250~300 mm
Linkage System	Three-point suspension II type
Key Features	Adjustable Depth, Adjustable Angle, Hardened Steel Discs, Heavy-duty Frame
