Product Overview

Industrial-Grade Mobility and Power

The Movable Axial Blower is engineered for high-performance ventilation in demanding professional environments. Featuring a robust, corrosion-resistant frame and a high-efficiency pure copper motor, it ensures reliable operation and longevity. With its integrated caster system and adjustable blade angle, this unit provides exceptional versatility for air circulation and extraction on construction sites and in industrial facilities.

Performance Specifications

Motor Construction	Pure copper motor
Key Design Attributes	Movable base with wheels, Angle-adjustable blades, High pressure capacity, Flexible duct compatibility

Applications & Use Cases

Recommended Use

- Underground ventilation
- Telecommunications infrastructure
- Tunnel repair projects
- Warehouse air circulation
- Construction site exhaust
