

Movable Ultraviolet Sterilizer

This movable ultraviolet sterilizer features a high-efficiency UV lamp. Its mobile design and adjustable arm allow for convenient positioning during operation.

Product Overview

Professional UV Disinfection Solution

The PSC60 is a professional-grade movable ultraviolet sterilizer designed for high-efficiency disinfection in sensitive environments. Utilizing a dual-lamp structure, it effectively eliminates bacteria and viruses through direct UV-C irradiation on both air and surfaces. Its mobile, adjustable design allows for precise positioning, making it an essential tool for maintaining stringent hygiene standards in healthcare facilities and clinical settings.

Technical Specifications

Timer Range	60 min
Lamp Configuration	Dual tube
Mobility	Yes

Features

Key Features

- Adjustable lamp arm for targeted irradiation
- Movable cart design for easy transport
- Automatic shut-off safety feature
- High-efficiency UV-C sterilization

Application Areas

Suitable Locations	Operating Rooms, Hospital Wards, Therapy Rooms, Laboratories, Cleanrooms
