Product Overview

High-Performance Cutting Solutions

This mower cutting blade is engineered for robust performance and longevity in demanding landscaping environments. Featuring a durable metal construction, it is designed to maintain cutting efficiency and structural integrity over extended use. The blade includes a precision-engineered central bore, ensuring secure mounting and compatibility with standard mower systems.

Technical Specifications

Material	Durable Metal
Design Features	Toothed Edge, Central Bore, Four-Pronged Design
Primary Application	Mower Cutting

Design and Compatibility

Blade Configuration

- Circular central body
- Four rectangular extensions
- Rounded blade ends
