

MP3/SD Card Karaoke Amplifier with Digital Echo

This karaoke amplifier features an MP3 player and SD card slot for versatile audio playback. It also has a digital echo processor and multiple input options.

Product Overview

Professional Karaoke Amplifier

This high-performance karaoke amplifier is designed for professional audio environments, featuring an aluminum front panel and a robust toroidal transformer for reliable power delivery. It includes an integrated digital echo processor for superior vocal effects and versatile input options including MP3, USB, and SD card playback. Equipped with comprehensive tone controls for both music and microphones, this system provides a professional-grade audio experience for karaoke enthusiasts and commercial venues.

Technical Performance

Output Power

120 W

Left Channel

120 W

Right Channel

Signal to Noise Ratio	92 dB
Frequency Response	20Hz - 20KHz
Line Input Sensitivity	300 mv

Inputs and Outputs

Audio Interface Configuration

- 2-3 Microphone Inputs
- 3-way Audio Input
- 2-way Line Output
- USB Port
- SD Card Slot

Physical Characteristics

Dimensions (LxWxH)	480 x 410 x 215 mm
Construction Details	Aluminum Front Panel, Toroidal Transformer, Active Cooling Fan

Features

Control & Processing

- Digital Echo (ES56031 IC)
- Music Tone Controls (High, Low, Balance)
- Microphone Tone Controls (High, Middle, Low)
- MP3 Playback & Radio Controls
