

MR16 Halogen Reflector Lamp

The MR16 is a multifaceted reflector lamp commonly used for accent and display lighting. This bulb features a clear glass lens and a reflector designed to focus the light beam.

Product Overview

MR16 Halogen Reflector Lamp

The MR16 is a versatile, multifaceted reflector lamp featuring a 2-inch diameter face, specifically engineered for precision accent and display lighting. This low-voltage halogen bulb delivers a bright, focused light output, making it an ideal choice for professional environments. Its durable design and clear glass lens ensure consistent performance in a wide range of applications, including track lighting, recessed ceiling fixtures, and landscape lighting setups.
