

Mud Pump Fluid End Module

This mud pump module is made of premium materials and is exchangeable with OEM products. It is designed to meet or exceed API-7K standards.

Product Overview

High-Performance Fluid End Module

This fluid end module is engineered for demanding industrial oilfield drilling applications, offering robust construction and high-precision machining. Designed to meet or exceed API-7K standards, it provides reliable performance and durability in harsh operating environments. The component is fully exchangeable with OEM products, ensuring seamless integration and maintenance.

Standards & Compliance

API Standard
API-7K

Technical Details

Material Quality	High grade premium materials
Compatibility	Exchangeable with OEM products
Part Reference	7K-0448

Product Features

Key Features

- High-precision machining
- Multiple ports and mounting points
- Central bore design
- Corrosion-resistant surface finish
- Tight manufacturing tolerances
