

Mud Pump Fluid End Module

These mud pump modules are constructed from premium materials to ensure durability. They are designed to be interchangeable with OEM products and meet or exceed API-7K standards.

Product Overview

High-Performance Fluid End Module

This high-precision machined mud pump fluid end module is engineered for the most demanding industrial drilling applications. Designed with robust construction, it features multiple ports and mounting points to ensure versatile integration into existing pump systems. Manufactured to tight tolerances, these modules are built to deliver reliable performance and extended service life even in the harshest operating environments.

Technical Specifications

Construction Standard

High-Precision Machining • Industrial Grade

Design Features

- Multiple integration ports
- Versatile mounting points
- Tight manufacturing tolerances

Model Number

7K-0448
