

Mud Pump Pinion Bearing

This is a pinion bearing designed for use in mud pumps. It provides support and enables smooth rotation.

Product Overview

High-Performance Mud Pump Bearings

These precision-engineered bearings are designed specifically for demanding mud pump applications in oil and gas drilling operations. Engineered for durability and reliability, they support critical components including pinion shafts, eccentric assemblies, and crossheads. Our range covers a comprehensive selection of industry-standard part numbers compatible with major global pump manufacturers.

Technical Specifications

Available Part Numbers

- 23160/C9W33
- 3G3003760Y
- 292/660.4QU
- NUP464777Q4/COYA4
- 4G32844H
- 254941QU

Compatibility

Compatible Series

Manufacturer	Series/Models
Emsco & BOMCO	F series, DB-550, DA-700, FA-1600/1300, FC-2200, D-300/500, D-375, D-700
Ideco	T-500, T-800, T-1000, T-1300, T-1600
National	7P50, 8P80, 9P100, 10P130, 12P160, N1300, C-250, K-700, 14-P-220, E-700/G-1000, K-500, K-380, K-500A/700A, C-250/350, JWS-400
Gardner Denver	PZ7, PZ8/9, PZ10/11, FK-FXK, FY-FXD, FD-FXX, FG-GXG, FG-FXG, KG-KXG, FQ-FXQ
Oilwell	A-560/600-PT, A-850-PT/A-1100-PT, A-1700-PT/A-1400-PT

Supported Pump Brands

Emsco, BOMCO, Ideco, National, Gardner Denver, Oilwell
