

Mud Pump Replacement Valve Set

This set is made of premium materials and designed as a replacement for API mud pump valves. These components ensure proper sealing and fluid control in drilling and industrial applications.

Product Overview

High-Performance Mud Pump Components

These replacement valve sets are engineered for demanding drilling environments, offering robust performance that meets or exceeds API-7K standards. Constructed from high-strength alloy steel with a deep carburized wear surface, they ensure durability and reliable fluid control. Designed for seamless compatibility, these components are fully exchangeable with OEM equipment to minimize downtime.

Technical Specifications

Available Valve Types

- Full Open Valves & Seats
- 3/4 Web Valves & Seats

Insert Options

Bonded Insert Type • Replaceable Insert Type

Compliance Standards

API-7K

Material

High strength alloy steel with deep carburized wear surface

Compatibility & Support

Certification

API Certified

OEM Compatibility

Yes
