Product Overview

High-Performance Mud Pump Valve Assembly

This mud pump valve assembly is engineered for demanding industrial applications, offering robust construction for reliable operation in abrasive and corrosive environments. Designed to meet or exceed API-7K standards, these valves ensure optimal flow control and pressure regulation. The assembly features high-strength alloy steel with a deep carburized wear surface, providing exceptional resistance to wear and extended service life.

Technical Specifications

Valve Types Available

- Full Open Valves & Seats
- 3/4 Web Valves & Seats

Insert Options

- Bonded insert type
- Replaceable insert type

Performance Features

Extreme Environment Compatible • OEM Exchangeable • High-Pressure Resistant

Compliance Standards

API-7K

Construction Materials

High strength alloy steel with deep carburized wear surface

Model Reference

7K-0448
