

Mulcher Tooth with Powder Carbide Coating

This cutter features a single cutting plane and a powder carbide coating. It is designed for chopping trees and various shrubs.

Product Overview

High-Performance Mulcher Tooth

This mulcher tooth is precision-engineered for heavy-duty vegetation management, featuring a specialized single cutting plane design. It is specifically optimized for efficient chopping of trees and various shrub types in demanding environments. Enhanced with a powder carbide coating, this component offers superior wear resistance and extended service life for professional machinery.

Technical Details

Cutting Planes	1
Surface Treatment	Powder Carbide Coating

Compatibility

Compatible Equipment	Agrimaster Mulchers
