

Multi-Apartment Video Door Phone System

This multi-apartment video door phone system features an integrated camera, speaker, and individual call buttons for each apartment. It enables two-way audio communication, video monitoring, and remote door access control.

Product Overview

Professional Multi-Apartment Intercom Solution

This video door phone system is engineered for multi-tenant residential complexes and apartment buildings. It features an integrated camera and speaker system with dedicated call buttons for individual units, facilitating reliable two-way audio communication. The system supports remote door access control and real-time video monitoring, providing enhanced security and convenience for residents and building management.

System Capabilities

Key Features	Two-Way Audio, Video Monitoring, Remote Access Control, Multi-Unit Support
Unit Capacity	12 apartments
