

Multi-Axis Industrial Robot

This industrial robot is designed for automated tasks. It features a multi-axis system for precise movements and versatile application in manufacturing and assembly processes.

Product Overview

High-Precision Industrial Automation

This multi-axis industrial robot is designed for high-performance manufacturing and assembly environments. It features a responsive multi-CPU control system, ensuring fast processing speeds and high operational accuracy. With an integrated 8.4-inch user-friendly touch interface, it supports seamless interaction and complex automated tasks including electric positioning.

Technical Specifications

Positioning Accuracy	0.01 mm
Touch Screen Size	8.4 inch
Supported Languages	Chinese, English

Functional Features

Core Functionalities

- High-speed system response
- High-precision motion control
- Electric positioning
- Stackable signal processing

Control System Architecture	Multi-CPU control
