

Multi-Blade Air Circulator Fan

This air circulating fan is designed to provide efficient and consistent airflow. It features a multi-blade design encased within a protective grill and a rotary dial on the base for adjustable speed settings.

Product Overview

Efficient Air Circulation

This multi-blade air circulating fan is engineered to provide consistent and effective airflow for personal or small space cooling. Its robust construction features durable white plastic with gray accents, ensuring a clean aesthetic that fits various environments. Equipped with a protective grill and a stable base, it prioritizes both safety and operational reliability.

Design & Build

Safety Features

Protective Grill • Stable Base

Primary Material	Durable Plastic
Color Scheme	White, Gray

Performance

Recommended Use

- Personal cooling
- Small space circulation

Control Method	Rotary Dial
