

Multi-Blade Axial Ventilation Fan

This multi-blade axial fan is designed for ventilation and air circulation. Its durable construction and aerodynamically shaped blades ensure efficient airflow in demanding environments and household appliances.

Product Overview

High-Performance Axial Ventilation

This multi-blade axial fan is engineered for superior air circulation and ventilation efficiency. Featuring a robust central hub with five aerodynamically optimized blades, it is designed to deliver consistent airflow in demanding environments. It is an ideal component for integration into household electrical appliances, such as air conditioning units and dedicated ventilation systems.

Technical Specifications

Number of Blades	5
Fan Type	Axial
Typical Applications	Air Conditioning, Ventilation Equipment, Household Appliances
