

# Multi-Blade Fan for Air Movement and Ventilation

This multi-blade fan is designed for electrical and exhaust fan applications. It features a robust construction for efficient air movement and ventilation.

## Product Overview

### High-Efficiency Multi-Blade Fan

This multi-blade fan is engineered for superior air movement and ventilation performance. Designed with a robust construction, it ensures reliability and efficiency in demanding cooling and exhaust applications. It is an ideal component for household electrical appliances, air conditioning units, and specialized ventilation equipment.

## Technical Specifications

### Design Features

- Multi-blade configuration
- Optimized airflow geometry
- Robust construction
- High-efficiency cooling

### Primary Applications

Household Appliances, Air Conditioning, Ventilation Equipment, Exhaust Systems

## Performance Metrics

### Airflow Optimization

High Efficiency • Optimized Design
