

Multi-Bottom Tractor Plow

This multi-bottom plow is designed for efficient soil preparation and cultivation. The implement features a robust steel frame and independently adjustable plows, ensuring optimal performance for various soil conditions.

Overview

High-Efficiency Soil Cultivation

This multi-bottom tractor plow is engineered for superior soil preparation and efficient cultivation across diverse agricultural landscapes. Featuring a robust steel frame and three independently adjustable plows, it ensures consistent performance and durability in varying soil conditions. The implement is designed for seamless integration with standard three-point hitch systems, promoting effective soil turning and residue incorporation for optimal seedbed preparation.

Technical Specifications

Adjustability

- Independently adjustable plows
- Adjustable depth control

Number of Plow Bottoms	3
Mounting System	Three-point hitch
Material Composition	Hardened Steel, Robust Steel Frame

Performance Metrics

Operational Benefits

Improved Seedbed Preparation • Effective Residue Incorporation • Enhanced Weed Control
