

Multi-Cavity Plastic Injection Mold

This multi-cavity plastic injection mold is engineered for high-volume production. Its robust design and integrated cooling system ensure consistent part quality and efficient cycle times.

Product Overview

Precision Multi-Cavity Injection Molds

This precision-engineered plastic injection mold is designed for high-volume manufacturing environments. Featuring a multi-cavity configuration, it significantly increases production efficiency while maintaining consistent part quality through integrated cooling channels. Constructed from high-grade steel, this tooling solution is built for durability and long-term performance across a variety of thermoplastic materials.

Technical Capabilities

Key Features

- Multi-cavity configuration for high-volume production
- Integrated cooling channels for reduced cycle times
- Robust alignment mechanisms
- Ejector pin system included
- High-grade steel construction

Typical Applications

Automotive Parts, Semiconductor Components, IC Connectors, Lead Frames, Electrical Connections, Motor Fixed Rotors

Quality & Standards

Quality Management

ERP System Managed • Standardized Process Control • Laboratory Tested
