

Multi-Column Steel Radiator

This steel radiator is designed with multiple columns to enhance its heating efficiency. It is suitable for use in both homes and commercial buildings.

Product Overview

High-Efficiency Heating Solution

This multi-column steel radiator is engineered for optimal heat distribution in both residential and commercial environments. Its robust steel construction ensures durability, while the multi-column design maximizes surface area to provide superior heat output. Finished with a smooth, powder-coated surface, this unit combines long-lasting performance with a clean, modern aesthetic.

Technical Specifications

Material	Steel
Finish	Powder-coated
Included Accessories	Mounting brackets

Applications

Suitable Environments
Residential • Commercial
