

Multi-Conductor Communication Cable

This is a multi-conductor communication cable with a gray outer jacket. It is designed for signal transmission in electronic communication systems and contains multiple insulated wires and shielding.

Product Overview

High-Performance Communication Cable

This multi-conductor communication cable is engineered for reliable signal transmission in complex electronic communication systems. Featuring a durable gray outer jacket, the cable is built to protect internal components from environmental interference. The internal architecture includes precision-insulated blue and white conductors, supported by advanced shielding layers to ensure signal integrity.

Technical Specifications

Jacket Color

Gray

Construction Features

- Multi-conductor design
- Insulated wiring
- Integrated shielding
- Protective outer jacket

Conductor Color Coding

Blue, White

Cable Type

Multi-Conductor Communication
