

Multi-Conductor Communication Cable

This communication cable features multiple copper conductors with color-coded insulation. It is encased in a black outer jacket and designed for signal and data transmission in electronic applications.

Product Overview

High-Performance Multi-Conductor Cable

This multi-conductor communication cable is engineered for reliable signal transmission and data communication across a wide range of electronic applications. Featuring high-quality copper conductors with distinct color-coded insulation, it ensures easy identification and efficient installation. The durable black outer jacket provides robust protection, making this cable a dependable choice for complex wiring systems and professional electronic infrastructure.

Physical Characteristics

Insulation Features

Color-coded • Multi-conductor

Outer Jacket Color	Black
Conductor Material	Copper

Applications

Primary Applications

- Signal transmission
- Data communication
- Electronic system wiring
