

Multi-Conductor Communication Cable

This communication cable consists of multiple insulated conductors, including twisted pairs, coaxial cables with shielding and single-core wires. Encased in a black outer jacket, it is designed for signal transmission and data communication in electronic systems.

Product Overview

High-Performance Multi-Conductor Communication Cable

This multi-conductor communication cable is engineered for reliable signal transmission and data communication within complex electronic systems. Featuring a robust design, it incorporates a variety of internal components including twisted pairs, shielded coaxial cables, and single-core wires to ensure signal integrity. The durable black outer jacket provides protection, making it a versatile solution for professional industrial and electronic applications.

Construction Details

Internal Composition

- Twisted pairs
- Shielded coaxial cables
- Single-core wires

Outer Jacket Color	Black
--------------------	-------

Application

Primary Applications	Signal Transmission, Data Communication, Electronic Systems
----------------------	-------------------------------------------------------------
