

Multi-Conductor Telephone Cable

This telephone cable consists of multiple insulated conductors within a protective outer jacket. Designed for voice and data communication, this cable ensures reliable signal transmission for telephone systems and related applications.

Product Overview

Professional Communication Cabling

This multi-conductor telephone cable is designed for reliable voice and data transmission in telecommunications systems. The cable features high-quality insulated conductors housed within a durable protective jacket, ensuring long-term performance. Color-coded internal wiring is utilized throughout to simplify installation and termination processes for professional integrators.

Technical Specifications

Available Models	KF.XT-2, KF.XT-4
Manufacturing Origin	Zhejiang, China (Mainland)

Logistics & Packaging

Standard Roll Length	100 M
Quantity per Carton	4 rolls
Carton Dimensions	37x37x29 cm

Commercial Terms

Shipping Ports

- Ningbo
- Shanghai

Payment Terms	L/C or Deposit
Estimated Lead Time	30 days after L/C or deposit receipt
