

Multi-Cooker Pressure Pot with Glass Lid

This pressure pot features a food-sealing rubber ring and a tempered glass lid for easy monitoring. It offers multiple cooking functions, including boiling, stewing, steaming, and frying, all in one pot.

Product Overview

Versatile Micro-Pressure Cooking

This multi-cooker pressure pot is designed for high-efficiency cooking, utilizing advanced micro-pressure technology to significantly reduce preparation times. The medical stone non-stick coating ensures healthier meals and easy cleanup, while the durable die-cast construction guarantees long-term reliability in a professional or domestic kitchen. With a visual tempered glass lid and multi-function capabilities including boiling, stewing, steaming, and frying, it offers the ultimate flexibility for diverse culinary tasks.
