

Multi-Core Shielded Communication Cable

This multi-core cable features braided shielding for EMI/RFI protection. Its durable outer jacket makes it suitable for data transmission and signal control.

Product Overview

High-Performance Communication Cable

This multi-core shielded communication cable is engineered for reliable data transmission and signal control in demanding electronic systems. It features high-quality internal wiring and robust braided shielding to effectively mitigate EMI and RFI interference. Designed with a durable outer jacket, it ensures long-lasting performance in various industrial and commercial environments.

Technical Specifications

Shielding

Braided Shielding • EMI Protection • RFI Protection

Primary Applications

- Data transmission
- Signal control
- Electronic systems

Cable Type

Multi-core shielded communication cable

Construction Features

Multi-core, Durable Jacket, Color-coded internal wires
