

Multi-Cylinder Diesel Engine for Industrial and Agricultural Use

This multi-cylinder diesel engine is a robust and reliable power source designed for various industrial and agricultural applications. It features a radiator cooling system for efficient heat dissipation, ensuring optimal performance under heavy loads.

Overview

Industrial & Agricultural Power Solution

This multi-cylinder diesel engine is a robust and reliable power source engineered for demanding industrial and agricultural applications. Featuring a compact design with an SAE connection, it offers easy assembly and integration into generator sets, water pumps, and marine equipment. With optimized engineering, the unit delivers stable performance, low noise, and efficient energy consumption, making it a dependable choice for diverse operational environments.

Technical Specifications

Power Output

27 hp

Power

Model	380B
Rated Speed	3000 rpm

Key Features

Engineering Advantages

- Low-speed regulation for stable performance
- Minimized vibration and noise levels
- Optimized design for energy efficiency and durability
- Compact structure with SAE connection for easy mounting

Applications

Common Applications	Generators, Water Pumps, Marine Power, Agricultural Machinery
---------------------	---
