

# Multi-Deck Vertical Glass Door Cooler

This ventilated cooler is designed with a Carel controller and vertical LED lighting. It features a hollow low-E glass door and a bottom hook design for easy cleaning.

## Overview

### Professional Multi-Deck Vertical Cooler

This multi-deck vertical glass door cooler is engineered for high-performance commercial refrigeration and product display. Featuring advanced temperature control and energy-efficient LED lighting, it ensures optimal preservation and visibility for beverages, dairy, and perishables. Its robust design, including a hollow Low-E glass door and easy-to-clean bottom hook configuration, makes it an ideal solution for demanding retail environments.

## Technical Specifications

Controller	Carel controller
Standard Voltage	220V/60HZ (Optional)

## Design & Features

Internal Lighting	Vertical LED light
Door Construction	Hollow glass door with Low-E standard
Optional Features	Aluminium frame glass door, Film heater

## Maintenance

### Maintenance Features

- Bottom hook design for easy cleaning
- Self-evaporation system
