Product Overview

High-Performance Multi-Directional Reception

This outdoor HDTV antenna is engineered for optimal signal capture from multiple directions, ensuring consistent and high-quality reception even in challenging signal environments. Featuring a compact, aerodynamic design with a durable, UV-coated ABS housing, it provides a weather-resistant solution that blends seamlessly with modern building exteriors. The unit supports both passive and amplified modes, allowing for flexible installation on roofs, balconies, or exterior walls without the bulk of traditional yagi antennas.

Technical Specifications

Model Performance Metrics

Model	Gain	Power Supply
AV-165CA	12.5dB	Passive
AV-165C	36dB	DC 12V Amplified
AV-165CBP	12.5dB or 36dB	Switchable (Passive/Amplified)
Frequency Range	UHF 470-862MHz	
Impedance	75 Ω	
Noise Figure	d3.6B	

Key Features

Installation Advantages

- Tool-free installation process
- Includes mounting accessories
- Suitable for roofs, balconies, and walls
- Compact design reduces wind load

Reception Capabilities

Multi-directional, Enhanced VHF, Digital Signal Ready

Durability

Build Quality

Weather-resistant • UV-coated • ABS Housing • Durable
