

Multi-Drawer Refrigerator with Rapid Cooling

This refrigerator features a five-layer freezer design for ample storage and organized food storage. It incorporates a high-efficiency compressor and thick foam layer for energy-saving performance and rapid cooling.

Product Overview

High-Efficiency Multi-Drawer Storage

This refrigerator features a sophisticated five-layer freezer design, optimized for high-volume storage and organized food management. Engineered with a high-efficiency compressor and dense microcellular foam, it provides rapid, energy-efficient cooling suitable for demanding environments. Its durable construction includes specialized serpentine tube evaporators to handle heavy loads, complemented by advanced sealed door technology to maintain food freshness.

Technical Specifications

Cooling Technology	Rapid Cooling, Serpentine Tube Evaporator, High-Efficiency Compressor
Insulation	High-density microcellular foam

Design and Aesthetics

Decorative Finishes

- Qinghua Porcelain Ice Crystal White
- Brocade Flower Han Tang Red
- Champagne Gold

Interior Features	Stainless Steel Wine Rack, Multi-Drawer System, Double-layer Sealed Door Seals
