

Multi-Driver Loudspeaker System

This high-performance loudspeaker system utilizes a multi-driver design to ensure enhanced audio reproduction. It includes a woofer for low-frequency response and a tweeter for clear high-frequency output.

Product Overview

High-Performance Multi-Driver Audio

This professional-grade loudspeaker system is engineered for superior audio reproduction across the frequency spectrum. By utilizing a dedicated multi-driver configuration, the unit effectively separates low-frequency output and high-frequency clarity. Its robust frame and versatile mounting system ensure reliable installation in demanding audio environments.

Technical Specifications

Mounting and Chassis

- Robust frame construction
- Integrated secure mounting system

Application Suitability

High Fidelity • Commercial Audio • Professional Sound

System Design

Multi-Driver, Woofer, Tweeter
