

Multi-Flute End Mill Cutter

This high-performance end mill cutter is designed for precision machining. It features a multi-flute design for efficient material removal and durable construction.

Product Overview

High-Performance End Mill Cutter

This multi-flute end mill cutter is engineered for precision machining tasks, offering superior material removal efficiency. Its durable construction ensures extended tool life, making it a reliable choice for demanding industrial environments. Designed for versatility, it performs exceptionally well across a range of materials including steel, aluminum, and various composites.

Technical Specifications

Compatible Materials

- Steel
- Aluminum
- Composites

Design Features

Multi-flute design • High-performance • Optimized shank diameter • Precision machining

Primary Applications

Milling, Slotting, Profiling

Machine Compatibility

CNC Machines
