

Multi-Function Computerized Sewing Machine

This computerized sewing machine is designed for diverse sewing and embroidery tasks. It features a computerized control system, a clear LCD screen, and supports various stitch patterns and embroidery designs.

Overview

Advanced Computerized Sewing Solution

This multi-function sewing machine is designed to streamline complex sewing and embroidery tasks through an intuitive computerized interface. Featuring a magnified LCD touch screen, it allows for precise pattern customization, including 360-degree rotation and pattern zooming. With built-in support for a wide array of stitches and characters, this machine provides the versatility needed for both professional and creative projects.
