Product Overview

Versatile Precision Measurement

This multi-function laser distance meter is a ruggedized, professional-grade tool designed for construction, surveying, and architectural applications. It combines four distinct measurement modes into one compact, ergonomic device, allowing for efficient distance, area, and volume calculations. With features like roller measurement, laser targeting, and environmental monitoring, it is an essential asset for verifying structural layouts and material quantities on-site.

Measurement Capabilities

Measurement Modes

- Roller mode
- Laser distance measure mode
- Leveling
- Temperature/moisture mode

Design & Build

Housing Features

Ruggedized, Ergonomic, Compact, Yellow Housing

Connectivity & Interface

Interface Features

- Digital display screen
- Bluetooth connectivity
- USB charging port
- Rotary adjustment knob
