

Multi-Function Lathe Milling Drilling Machine

This multi-purpose machine integrates lathe, milling, and drilling functions into a single unit. It is designed for small workshops and educational institutions, offering versatility in machining operations.

Overview

Versatile Machining Solution

The HQ-400V is a highly versatile multi-purpose machine engineered to combine lathe, milling, and drilling operations into a single, space-efficient unit. Designed for precision and reliability, it is an ideal choice for small workshops, educational training environments, and specialized projects. Featuring a robust build and variable speed control, it allows operators to efficiently handle turning, facing, threading, milling, and shaping tasks with ease.

Machine Capabilities

Suitable For

Small Workshops • Hobbyists • Educational Institutions

Core Functions

Lathe, Milling, Drilling, Turning, Facing, Threading, Shaping

Drive System

Variable speed motor

Safety & Control

Safety Equipment

- Emergency stop button
- Chuck guard
