

Multi-Function Timer Relay

This multi-function timer relay is designed for industrial and automation applications. Adjustable timing ranges and multiple operating modes are selectable via DIP switches for precise control and flexibility.

Product Overview

Versatile Multi-Function Timer Relay

The TH-208 is a highly adaptable timer relay engineered for diverse industrial and automation control requirements. Featuring a compact DIN rail-mountable enclosure, it offers seamless integration into standard control cabinets. Users benefit from precise timing flexibility through user-selectable operating modes and adjustable ranges set via onboard DIP switches.

Technical Features

Mounting Type	DIN Rail
Feedback	LED status indicators
Terminal Configuration	Clearly labeled terminals for simplified wiring

Control Flexibility

Adjustment Mechanism	DIP switches
Functionality	Multiple selectable operating modes
