

Multi-Function Weighing and Form-Fill-Seal Packaging Machine

This machine integrates weighing and vertical form-fill-seal (VFFS) functions to streamline packaging operations. It is suitable for packaging granular materials, snacks, powders, and small hardware items.

Overview

Automated Packaging Solution

This multi-function weighing and form-fill-seal packaging machine offers a comprehensive solution for automated packaging processes, handling everything from feeding and measuring to filling and sealing. Designed for high precision and efficiency, the system ensures stable performance while minimizing material waste. Its versatile construction makes it an ideal, cost-effective choice for packaging various granular and bar-shaped materials such as candy, rice, and nuts.

Key Features

Packaging Capabilities

- Automated feeding
- Precision measuring
- Efficient filling
- Integrated printing
- Finished bag production
