

Multi-Functional Construction Vehicle

This multi-functional construction vehicle combines loader, excavator, and bulldozer capabilities. It is designed for digging, loading, and earthmoving in construction and infrastructure applications.

Overview

Versatile Construction Powerhouse

This multi-functional construction vehicle is engineered to handle a wide range of earthmoving tasks, seamlessly combining loader, excavator, and bulldozer capabilities in a single unit. Designed for efficiency on diverse job sites, it features a robust chassis and high-traction tires to ensure maneuverability across challenging terrains. With its integrated front-end loader bucket and rear-mounted hydraulic excavator arm, this machine provides the versatility needed for heavy-duty infrastructure and construction projects.

Technical Specifications

Equipment Features

- Front-end loader bucket with digging teeth
- Rear-mounted excavator arm with hydraulic cylinders
- Robust heavy-duty chassis
- High-visibility yellow operator cab

Model Designation	WZ30-25
Key Functions	Loader, Excavator, Bulldozer, Digging, Earthmoving

Operational Metrics

Performance Metrics

30 kN

Loader Capacity Class

25 kN

Excavator Rated Power
