

Multi-Functional Food Processor for Soy Milk, Rice Paste, and Corn Juice

This multi-functional food processor features a streamlined body and food-grade materials. It integrates multiple functions including making five-grain soymilk, dry soymilk, nutritious rice paste, wet soymilk, and corn juice.

Product Overview

Versatile Kitchen Solution

This multi-functional food processor offers a streamlined, aesthetic design constructed from durable, food-grade materials. Engineered for safety and performance, it features intelligent anti-overflow and anti-dry burning protection systems. The net-less design with reinforced ribs creates a powerful vortex for superior crushing, ensuring smooth results for soy milk, rice paste, and corn juice.

Key Features

Cooking Functions

Five-grain Soymilk, Dry Soymilk, Wet Soymilk, Nutritious Rice Paste, Corn Juice

Safety & Intelligent Control

Safety Systems

- Intelligent anti-overflow protection
- Automatic water level detection
- Intelligent anti-dry burning protection
- Automatic power-off alarm
- Water shortage probe
- Automatic locking nuts

Design & Build

Materials

Food-grade PC • Heat-resistant • Shatter-resistant

Design Highlights

- Streamlined body for easy cleaning
- Machine head waterproof design
- Net-less design with reinforcing ribs
- Step-style stirring and cooking coordination

Performance

Advanced Processing Technology

The appliance utilizes a net-less bucket design with internal reinforcing ribs to generate a mechanical vortex, which significantly enhances the crushing efficiency. Combined with a traditional step-style stirring and gentle simmering program, it ensures complete nutrient extraction without residue, delivering a fragrant and healthy end product.
