Overview

Comprehensive Safety and Pest Control

This multi-functional device integrates advanced combustible gas sensing technology with a 20KHz-45KHz ultrasonic pest repellent system. It provides continuous indoor monitoring for gas leaks, including LPG, natural gas, and town gas, while simultaneously deterring pests such as mice and mosquitoes. Featuring a durable PC anti-ultraviolet housing and wide voltage compatibility, it is an essential safety solution for kitchens, offices, and warehouses.

Performance

Detectable Gases	LPG, Natural Gas, Town Gas
Alarm Concentration Range	2%LEL - 8%LEL
Alarm Volume	85 dB
Ultrasonic Frequency Range	20KHz - 45KHz
Pest Repellent Coverage	20 sqm

Electrical

Power Source	AC 100V-240V / 50-60Hz
Rated Load	2 W

Environment

Operating Temperature	-20°C to +40°C
Operating Humidity	<85% RH

Design

Housing Material	PC Anti-Ultraviolet Engineering Plastic
