

Multi-Gang Duplex Receptacle Wall Plate

This multi-gang duplex receptacle wall plate is designed to cover and protect multiple electrical outlets. Constructed from durable GE Polycarbonate, it offers maximum resistance to impact, abrasion, fading, discoloration and grease.

Product Overview

Durable Multi-Gang Protection

This multi-gang duplex receptacle wall plate is engineered from high-quality GE Polycarbonate (PC) to provide exceptional durability in high-abuse environments. Designed to withstand mechanical stress, impact, and abrasion, it offers a long-lasting, clean aesthetic that resists fading, discoloration, and moisture. The smooth, easy-to-clean finish and rounded edges ensure both safety and a professional appearance for residential and commercial electrical installations.

Material and Construction

Material	GE Polycarbonate (PC)
Resistance Properties	Impact Resistant, Abrasion Resistant, Fade Resistant, Moisture Resistant, Solvent Resistant

Installation and Design

Installation Highlights

- Captive screw feature for quick mounting
- Color-matched metal screws included
- Smooth finish resists dust accumulation
- Rounded edges to prevent injury and wall damage

Compliance and Safety

Certifications

UL Listed • CUL Listed • ETL Listed

UL File Number	E252773
