

Multi-Head Electric Fan with Adjustable Air-flow

This electric fan features multiple independently adjustable fan heads, allowing for customized airflow direction and intensity. Its durable construction and sleek design make it suitable for various interior styles.

Product Overview

Versatile Air Circulation Solution

The HYD-14A is a specialized electric fan engineered for optimal air circulation in diverse environments. Featuring a central hub with multiple independently adjustable fan heads, it allows users to customize both airflow direction and intensity to suit specific needs. Its robust construction ensures long-term durability, while the sleek, modern design integrates seamlessly into professional offices, commercial spaces, and residential interiors.
