

Multi-Head Embroidery Machine for Garments and Shoes

This multi-head embroidery machine is designed for high-volume production. It features a computerized control panel and a robust frame for stability.

Overview

High-Efficiency Embroidery Solution

This multi-head embroidery machine is engineered for high-volume production environments, specifically serving the garment, footwear, and accessories industries. It features multiple embroidery heads for simultaneous operation, significantly increasing throughput and consistency. With its computerized control panel and robust construction, it ensures precise pattern programming and stable performance during high-speed operation on a wide variety of fabrics and materials.

Technical Capabilities

Operation Mode	Multi-head simultaneous operation
Compatible Materials	Garments, Shoes, Accessories, Various Fabrics

Features

Build Quality

Robust Frame • High-Speed Capable • Industrial Grade

Control System

Computerized control panel for pattern programming
