

Multi-Head Equin Attaching Machine

This multi-head equin attaching machine is designed for apparel and textile manufacturing. It features multiple heads to increase productivity in efficient and precise attachment processes.

Overview

High-Efficiency Attaching Solution

The Multi-Head Equin Attaching Machine is a specialized industrial solution designed for the apparel and textile manufacturing sectors. Engineered for high-volume production environments, this machine features multiple heads to significantly increase throughput and operational efficiency. It provides consistent and reliable performance, making it an essential asset for manufacturers seeking to streamline their attachment processes.

Technical Details

Compatible Models	BSS-800, BSS-702, GEM1852
Machine Type	Multi-Head Equin Attaching Machine

Performance

Productivity
High-Volume Production • Multi-Head Design

Application

- Industry Suitability**
- Apparel Manufacturing
 - Textile Industry
