

Multi-Head Gazebo Heater

The gazebo heater is designed for outdoor use. Its multi-head design provides directional heat, and its durable construction ensures longevity in various outdoor conditions.

Overview

Efficient Outdoor Heating

The Multi-Head Gazebo Heater is specifically engineered for outdoor environments, offering a versatile solution for heating gazebos and similar structures. Its multi-head design allows for precise, directional heat output, ensuring comfort exactly where it is needed. Constructed with durable, weather-resistant materials, this unit is built to withstand outdoor conditions while maintaining reliable performance.

Technical Specifications

Design Type

Multi-Head • Directional Output

Model Number

ZHQ3032-P

Intended Use

Outdoor, Gazebo, Patio

Features

Durability Features

- Weather-resistant finish
- Durable construction materials
- Reliable outdoor performance

Installation

Designed for easy installation and operation
