

Multi-Lane Stick Pack Filling and Sealing Machine

This high-speed, automated packaging solution efficiently fills and seals stick packs. It is suitable for packaging granular, powder, and liquid products in precise quantities.

Overview

High-Speed Automated Packaging Solution

This multi-lane stick packing machine is designed for the efficient, automated filling and sealing of granular, powder, and liquid products. It features a robust stainless steel hopper and multiple lanes for simultaneous, high-volume production. Equipped with a user-friendly control interface, operators can easily adjust filling volumes, sealing temperatures, and machine speeds to ensure consistent, airtight packaging.

Technical Specifications

Mobility	Yes
Safety Features	Transparent Safety Enclosure, Safe Operation Environment
Construction Material	Stainless Steel

Performance Metrics

Key Capabilities

- Simultaneous multi-lane filling
- Precise airtight sealing
- Adjustable filling volume
- Variable sealing temperature
- Variable speed control

Application

Suitable Product Types

Granular • Powder • Liquid
