Overview

Advanced Air Purification System

This high-performance air purification unit features a multi-layer filtration system designed to effectively capture pet dander, pollen, smoke, and various airborne pollutants. Equipped with dual sensors for real-time dust and odor detection, it automatically adjusts its performance to maintain optimal indoor air quality. The system utilizes a DC fan motor, ensuring energy-efficient operation with significantly reduced noise levels.

Technical Specifications

Filtration Stages

- Pre-filter
- HEPA filter
- Activated carbon filter

Motor Type

DC Fan Motor

Integrated Sensors

Dust Sensor, Odor Sensor

Features & Modes

Available Modes

Auto Mode • Sleep Mode

Smart Features

- Real-time air quality monitoring
- Filter replacement indicator
- Timer function
- Wi-Fi connectivity for remote control
