

Multi-Layer Steel Cylinder Head Gasket

This multi-layer steel (MLS) cylinder head gasket is designed for optimal sealing and durability in automotive engines. It provides a tight and reliable seal between the cylinder head and engine block, preventing leaks and maintaining optimal engine performance.

Product Overview

High-Performance MLS Cylinder Head Gasket

This Multi-Layer Steel (MLS) cylinder head gasket is engineered for optimal sealing and durability in demanding automotive engine environments. Constructed with multiple steel layers, it provides exceptional resistance to the extreme temperatures and pressures found within high-performance engines. The design ensures a reliable, leak-free seal between the cylinder head and engine block, effectively preventing loss of compression and maintaining efficient combustion.

Technical Specifications

Key Performance Benefits

- High thermal resistance
- Pressure handling capability
- Maintains compression
- Prevents fluid leaks

Construction

Multi-Layer Steel (MLS)

Sealing Features

Combustion Bore Seals, Coolant Passage Seals, Oil Passage Seals

Application

Application Compatibility

Suitable for a wide range of automotive engine types and applications requiring high-durability sealing solutions.
